authors scholars and scientists whose mother tongue is not one of the major languages of international communication are seriously disadvantaged some individuals such as Joseph Conrad or Vladimir Nabokov have overcome that handicap brilliantly others learn to live with it they can express themselves sufficiently lucidly in a second language to make their voice heard internationally at least when they have something original or striking to say they will be certain to reach their peers most scientists and scholars fall into that category others again have to wait until their work has been translated before its value is recognised this may apply even to those whose mother tongue is widely read the writings of Frenchmen Lyotard Derrida Baudrillard or Foucault on post modernism on language discourse and power for example had tremendous world wide impact only after English translations appeared on the market de Gans study of the development of population forecasting in the Netherlands is another striking illustration of the effects a language barrier may have he demonstrates convincingly that although a possibly somewhat awkward Dutchman named Wiebols was a pioneer of modern cohort component demographic forecasting he never received international recognition for this in his thesis of 1925 Wiebols employed the newest instruments of demographic analysis in improving forecasting methodology
