the united states routinely has one of the lowest voter turnout rates of any developed democracy in the world that rate is also among the most internally diverse since the federal structure allows state level variations in voting institutions that have had and continue to have sizable local effects but are expansive institutional efforts like mail in registration longer poll hours and no excuse absentee voting uniformly effective in improving voter turnout across states with how the states shaped the nation melanie jean springer places contemporary reforms in historical context and systematically explores how state electoral institutions have been instrumental in shaping voting behavior throughout the twentieth century although reformers often assume that more convenient voting procedures will produce equivalent effects wherever they are implemented springer reveals that this is not the case in fact

convenience voting methods have had almost no effect in the southern states where turnout rates are lowest in contrast the adverse effects associated with restrictive institutions like poll taxes and literacy tests have been persistent and dramatic ultimately springer argues no single institutional fix will uniformly resolve problems of low or unequal participation if we want to reliably increase national voter turnout rates we must explore how states voting histories differ and better understand the role of political and geographical context in shaping institutional effects
